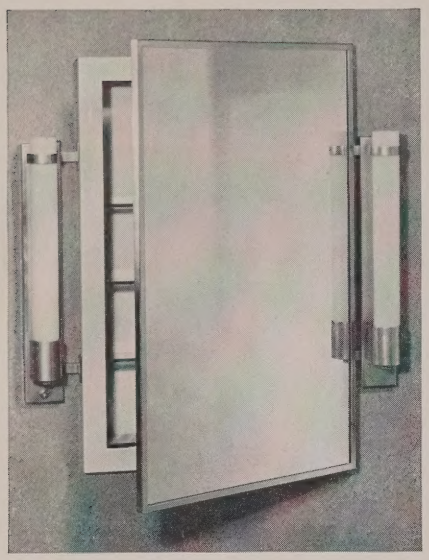
THE TUBE-O-LITE
THE CABINET WITH PERFECT LIGHTING



FRAMED SIMPLICITY TUBE-O-LITE CABINET

In the design of this new Hess Cabinet we have combined beauty with usefulness in a most attractive and practical manner. Neatly and securely attached to the cabinet are handsome chromium plated mountings which support long slender opal glass tubes which extend up each side of the mirror. Standard tubular Mazda lamps inside the tubes produce a long source of light from both sides of the cabinet which completely illuminates the body, eliminating all glare and shadows, a flood of perfect light for making the toilet or for shaving. All the features are bathed in light; gone are the shadows from the top of the head and under the nose and chin. The tubes produce an abundance of light, sufficient for bathrooms of ordinary size, without additional lighting facilities.

A NIGHT LIGHT-- It is a great convenience at all times to have a night light in the bathroom, and particularly when entertaining and there are guests in the home. With the **TUBE-O-LITE** Cabinet this convenience is yours, for a turn of the switch, conveniently placed on the left hand mounting, produces a soft glow (just right for night light) full illumination or darkness, as the occasion may require. The night light is trouble free for there is no rheostat or resistance to get out of order, the dimming being produced by throwing the two lights in series. When dimmed the current consumed is negligible.

The **TUBE-O-LITE** cabinets are completely wired with standard wiring devices and require only one electric outlet box, which is placed at the top of the recess. An access opening in the top of the cabinet permits the soldering and taping of the feed wires and the connecting of the ground wire after the cabinet has been installed in the recess. When the connections have been made, the access opening is closed with a neat steel cover.

The **TUBE-O-LITE** may be had with a choice of four mirrored doors to suit the individual taste. Mirrors with polished miter line decoration, or with no decoration whatever, are optional on the Venetian models.

SPECIFICATION

Mirrors: **"Seal bak"** mirror, selected plate glass heavily silvered **"Seal-bak"** protected, guaranteed against discoloration.

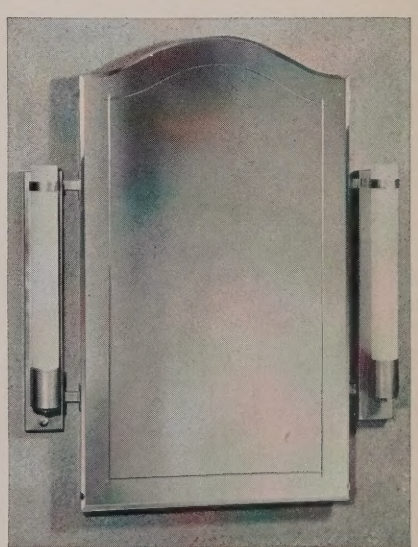
Doors: The construction of the doors is identical with the doors of our framed or unframed Venetian and Simplicity Cabinets.

Door Stops: Rustless beaded chain chromium plated.

Cabinets: The cabinet and door are of cold rolled steel, **"Bonderized"** (rust proofed) and are of Hess one piece construction, perfectly smooth inside, with no seams or raw edges to catch dirt. **The cabinet may be set in the recess, and the electrical connections made before the door is hung.**

Finish: White porcelain-like baked enamel, proof against soap and solvents usually found in medicinal preparations.

Shelves: The shelves are bulb edge glass, and are adjustable.



UNFRAMED VENETIAN TUBE-O-LITE CABINET MITER LINE DECORATION

Light Mountings: The light mountings are brass, heavily chromium plated and are securely attached to the cabinet. The tubes are opalescent diffusion glass, and lift out of the mounting for cleaning, etc.

Light Switch: The light switch is placed on the lower end of the left light mounting. It is a three way switch controlling both the night light and the full illumination.

Lamps: Standard Mazda lamps number T8 clear, 40 watts are required and are not included with the cabinet. They may be obtained from any public service company or lamp supply house.

On Venetian Tube-O-Lite models, we will supply miter line mirrors unless otherwise specified.

We can supply TUBE-O-LITE fixtures for mounting on wall, separate from the cabinet. List price, each $20.00

CAPRICE

The Cabinet with the Round Mirror

The Century of Progress Exposition focused the attention of the people upon the attractiveness of circular mirrors, and since 1933 their use for decorative purposes has become quite general. In the "Caprice" we have combined the attractiveness of the round mirror with the utility of a recessed cabinet, making it suitable for use in the most modern bathroom.

SPECIFICATION

Mirror: **"Seal bak"** mirror. Circle 24″ diameter. Beveled edge selected plate glass. Guaranteed against discoloration.

Door: Circular flanged pan containing insulating fiber cushion to protect mirror and to eliminate metallic sound. Mirror clips and door latch are polished stainless steel.

Door Stop: Rustless beaded chain, chromium plated.

Cabinet: The cabinet is constructed of cold rolled steel and "Bonderized" (rust proofed). **The octagonal steel cabinet box may be set and fastened in the recess before the door is hung.**

Finish: White porcelain-like baked enamel, proof against soap and solvents usually found in medicinal preparations.

Shelves: Bulb edge glass and plate shelf for bottom.

Mirror circular 24″ diameter
Wall opening octagon 20″ between sides 4¼″ deep.
Depth of return or body flange ⅞″

HESS FRAMED MIRRORED CABINETS

Hess Framed Cabinets are extremely well proportioned and beautifully made of the best and most suitable material. They will stand long hard usage and retain their bright appearance.

The polished chromium frame around the door not only adds to the style and attractiveness of the cabinet but serves to protect the mirror edges from damage.

When in place the mirrored doors of Hess Framed Cabinets set very close to the wall, the total projection from the face of the wall to the face of the mirror being slightly less than one inch. This produces a neat and pleasing appearance not secured in cabinets which project sufficiently to prominently expose the return flanges of the cabinet box.

SPECIFICATION

Mirrors: **"Seal bak"** mirrors, selected plate glass heavily silvered **"Seal bak"** protected, guaranteed against discoloration.

Doors: Doors are 9/32" thick, rubber cushioned and have channel section brass chromium plated frames with 7/16" face. Curved tops of frames on Venetian doors are die formed without distortion of surface. Backs of doors are steel, finished in white baked enamel. A fiber pad or cushion is placed between mirror and the back. Door latch is polished stainless steel.

Cabinets: Cabinet and door are made of cold rolled furniture steel and **"Bonderized"** (rust proofed). The cabinet is formed from one piece of steel, and is smooth inside, no raw edges to catch dirt. **The cabinet box may be set and fastened in the recess before the door is hung. This saves time in installing cabinets.**

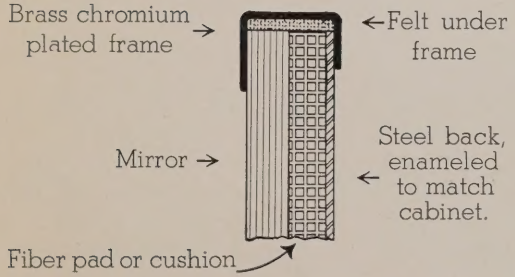
Finish: White porcelain-like, baked enamel, proof against soap, alcohol and all other solvents usually found in household medicinal preparations.

Shelves: Bulb edge glass, adjustable. A flat shelf, plate-thickness is supplied for the bottom of the cabinet.

Door Stops: Doors are provided with chromium plated beaded chain doorstops. Chain stops are noiseless and do not interfere with bottles on top shelf as do solid bar stops.

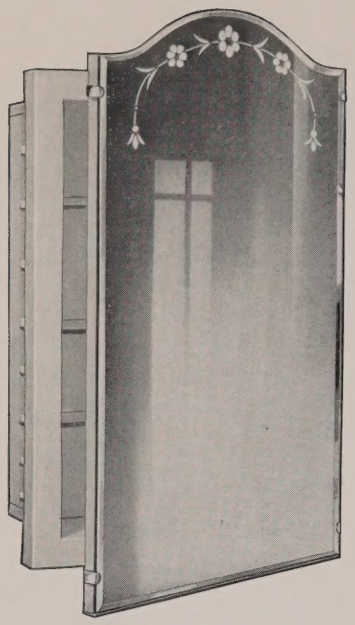
Design: Hess Framed Cabinets set very close to the wall. The total projection including the door is only **one inch.**

DOOR CONSTRUCTION OF HESS FRAMED CABINETS



Section thru Hess framed mirror

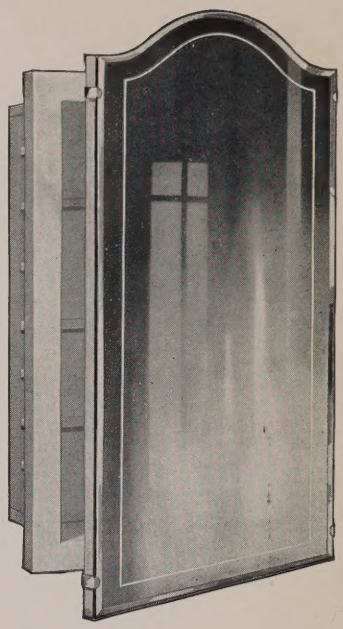
This is a cross section showing the construction of the doors of Hess Framed Cabinets. The entire weight of the door is carried upon the steel back, to which the hinges are attached, the back and the mirror being completely banded by the frame. The steel backs are finished in porcelain-like white baked enamel to match the cabinet. We call particular attention to the felt strip, placed all around the inside of the frame to prevent the edges of the mirror coming in contact with the metal. The fiber pad acts as a cushion for the mirror and a protection to the silvering.



VENETIAN ETCHED DECORATION

THE VENETIAN CABINET

These cabinets have the latest type mirror mounting (Hess Patent No. 1881576). The mirror is held firmly to the door by bright clips of stainless metal. Bolt holes thru the mirror are no longer necessary, which materially reduces the liability of breakage, while the elimination of the old fashioned rosettes provides a larger reflecting surface on the mirror.



POLISHED MITER LINE DECORATION

SPECIFICATION

Mirrors: Exceptionally high grade plate glass, carefully selected to eliminate defects. Beveled edges. Silvering heavy, **"Seal Bak"** protected, and guaranteed against discoloration.

Doors: One-half inch thick, rubber cushioned and containing insulating fiber pad or cushion which protects mirror and eliminates any rattle or metallic sound. Mirror clips and door latch are polished stainless steel.

Cabinets: Cabinet and door are made of cold rolled furniture steel and **"Bonderized"** (rust proofed). The cabinet is formed from one piece of steel, and is smooth inside, no seams or raw edges to catch dirt. **The cabinet box may be set and fastened in the recess before the door is hung. This saves time in installing cabinets.**

Finish: White porcelain-like, baked enamel, proof against soap, alcohol and all solvents usually found in household medicinal preparations.

Shelves: Bulb edge glass, adjustable.

Door Stops: Plated brass spring chain door stops. Chain stops are noiseless, and do not interfere with bottles on top shelf as do solid bar stops.

Mirrors with etched decoration, with miter line decoration, or with no decoration whatever are optional on Venetian Cabinets. Unless definitely specified when ordering, mirrors with etched decoration will be furnished. No. 1624 and No. 1826 have razor blade drops.

HESS SIMPLICITY CABINET

The Simplicity Cabinet with an "all mirror door" satisfies the modern taste for simpler things. The mirrors are mounted with stainless metal clips the same as our Venetian Cabinets.

SPECIFICATION

Mirrors: Exceptionally high grade beveled plate glass, carefully selected. The edges are ground smooth. Silvering is heavy, **"Seal Bak"** protected, guaranteed against discoloration.

Doors: One-half inch thick, rubber cushioned and containing insulating fiber pad or cushion which protects mirror and eliminates any rattle or metallic sound. Mirror clips and door latch are polished stainless steel.

Cabinets: Cabinet and door are made of cold rolled furniture steel and **"Bonderized"** (rust proofed). The cabinet is formed from one piece of steel, and is smooth inside, no seams or raw edges to catch dirt. **The cabinet box may be set and fastened in the recess before the door is hung. This saves time in installing cabinets.**

Finish: White porcelain-like, baked enamel. Proof against soap, alcohol and other solvents usually found in household medicinal preparations.

Shelves: Bulb edge glass, adjustable.

Door Stops: Plated brass spring chain door stops. Chain stops are noiseless, and do not interfere with bottles on top shelf as do solid bar stops. No. 1622 and No. 1824 have razor blade drops.

HESS FRAMED LAVATORY MIRRORS

These Hess mirrors are very attractive and are ideal for use over lavatories in hotels and offices, or in the washrooms of public buildings. The framed mirrors are selected plate glass, heavily silvered, **"Seal bak"** protected, guaranteed against discoloration. The frames are channel section brass and are heavily chromium plated. They are $19/32$" thick and have $7/16$" face. The back is a galvanized steel plate, with a thick fiber pad between it and the mirror, forming a cushion to minimize the danger of breakage. Concealed hangers securely attach the mirror to the wall with the long dimension either vertical or horizontal.

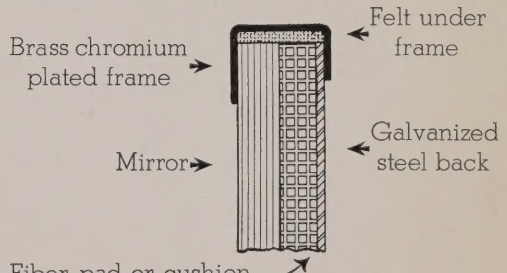
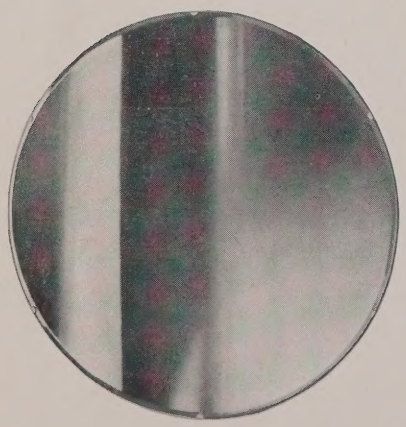
CONSTRUCTION OF HESS FRAMED MIRRORS

This is a cross section showing the construction of Hess Framed Lavatory Mirrors. The galvanized steel back and the mirror are completely banded by the frame. We call particular attention to the felt strip placed all around the inside of the frame to prevent the edges of the mirror coming in contact with the metal. The fiber pad acts as a cushion for the mirror and a protection to the silvering.



Section thru Hess framed mirror

CIRCULAR WALL HUNG MIRROR



This is a round mirror for wall hanging. It is used where a circular mirror is wanted and where a Caprice Cabinet either cannot be installed due to wall obstruction or is not desired. Round mirrors are very popular for decorative purposes.

SPECIFICATION

Mirror: 24" diameter circle. Exceptionally high grade selected plate glass with beveled edge. Silvering is heavy and **"Seal bak"** protected, guaranteed against discoloration.

Supporting Back: Circular, pan type made of cold rolled steel, white enameled, and containing an insulating fiber pad or cushion to protect the mirror. The mirror is attached to the back with small polished stainless steel clips.

Keyhole slot hangers in the steel back are used to hold mirror to the wall.

Shipping Weight 26 pounds Tel. Code Word—SOLAR
List Price Each **$29.50**

HESS STANDARD LAVATORY MIRRORS

These lavatory mirrors have substantial enameled steel backs, with protecting pads back of the mirrors. The mirrors are fine selected plate glass, heavily silvered, with beveled edges and are **"Seal bak"** protected, guaranteed against discoloration. They may be easily and solidly attached to the wall and the means of attachment entirely concealed. These are exceptionally fine mirrors offered at unusually low prices, being particularly suitable for use over lavatories in washrooms in offices, stores and public buildings. They are regularly furnished from stock in the two sizes shown, for mounting with the long dimension vertical. We can furnish any size for mounting either way on special order. These mirrors can be supplied with shelf and bracket attached; either glass or steel shelves at the buyer's option. Write for prices.

THE HESS HOTEL CABINET

The Hess Hotel Cabinet provides the maximum of convenience for the guest, at the lowest purchase and installation cost. Included with and securely attached to the cabinet is an overhead towel rack on which the daily supply of towels may be quickly and neatly placed and easily removed by the guest as needed, for the rack is straight and the towels lie flat. Directly over the mirror is a porcelain light fixture with pull chain socket and opal glass shade. Below to the left of the open pocket is placed a drinking glass holder which is designed to support the glass and prevent excessive breakage. Opposite the glass holder is a hook for the towel in use, the lower portion of this fixture terminating in a razor strop hook. The mirror is plain edge plate glass heavily silvered. The door is double thickness with a neat bevel edge frame 1¼″ wide. The cabinet and fixtures are finished in white porcelain-like baked enamel. The shelves are bulb edge glass with an additional glass plate to cover the pocket shelf. The cabinet is of cold rolled steel, **"Bonderized"** (rust proofed).

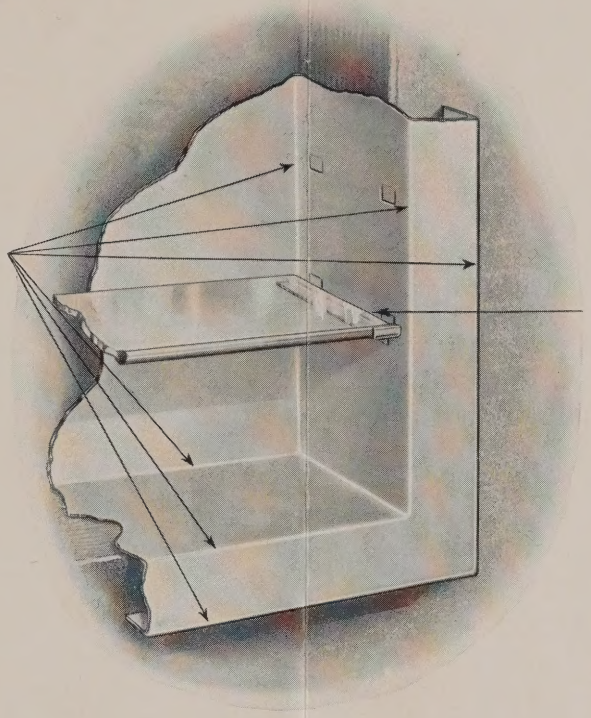
EXCLUSIVE FEATURES OF HESS CABINET CONSTRUCTION

All Hess mirrored recessed cabinets having rectangular boxes are formed from one piece of smooth cold rolled steel, eliminating all raw edges and unsightly dirt catching seams on the inside or on the face of the cabinet.

One-Piece Cabinet

Inside of cabinet perfectly smooth--- no seams--- no raw edges.



Note adjustable shelf bracket construction.

No projections. Cabinet easy to keep clean.

Shelves held in place, cannot fall out.

SHELF BRACKETS

The space inside of Hess Cabinets having adjustable shelves is all clear space, not diminished by numerous shelf brackets welded to the sides of the box. The shelf brackets have lugs in front to prevent shelves from being accidentally pulled out of cabinet.

A BETTER CABINET --- BETTER VALUE

All Hess Cabinets, except the Champion are now **"Bonderized"** by the **Parker Rust-proofing Process,** before the finish is applied. This is the rustproofing process used by the leading automobile and refrigerator manufacturers to protect and preserve the finish on their products.

We have always put a very fine finish on Hess Cabinets and prided ourselves on it. In spite of the finest of enamels and the best of workmanship in application, little accidents occurred when the cabinets were in use, to scratch or chip the enamel and in the moist atmosphere of the bathroom, the red disfigurement of rust would soon appear. This disfigurement is now a thing of the past, for **"Bonderizing"** not only protects the steel from rust but it binds the enamel finish to the metal, so that it is not easily damaged and will not peel off.

"BONDERIZING" IS THE CUSTOMER'S ASSURANCE OF THE LASTING FINE APPEARANCE OF HESS CABINETS.
